## **NEW BAR'S LEAKS REAR MAIN SEAL REPAIR STOPS SEVERE OIL LEAKS**

*Product is the first to chemically fix rear main seal leaks*

**Holly, MI (Feb. 6, 2007)** — Most engine oil leaks come from the vehicle's rear main seal. Having the seal professionally replaced can cost between \$400 and \$900. But now there is a cost-effective chemical repair for this common problem. New Bar's Leaks® Rear Main Seal Repair™ (P/N 1050) is the first off-the-shelf solution to stop rear main seal leaks, as well as other major oil leaks.

The rear main seal is located between the engine and the transmission. Leaks here occur most frequently in vehicles that are at least four years old with 60,000 miles or more. They are caused by a combination of normal wear in the crankshaft and seal, and by the drying, hardening and shrinking of the seal over time. Bar's Leaks Rear Main Seal Repair restores seal size, flexibility and elasticity. Chemical polymers in the product also fill in gaps and grooves caused by normal engine wear.

“You have to look no further than most driveways and any parking lot for signs of this problem. Bar's Leaks Rear Main Seal Repair gives vehicle owners an inexpensive solution to persistent oil leaks,” says Clay Parks, vice president of marketing and development. “Rather than spending hundreds of dollars to repair older, high-mileage vehicles, drivers can eliminate their oil leaks with a \$9.99 chemical repair.”

Bar's Leaks Rear Main Seal Repair works with all gasoline and diesel engines using conventional, high-mileage or synthetic motor oil. A single bottle is added to the engine crankcase with every oil change. It was specifically designed to repair rear main seal leaks, but it also works better than conventional stop leaks on all other engine oil leaks, including those at the timing cover seal, O-rings and other gaskets.

Bar's Leaks Rear Main Seal Repair is available in case packs of four 32-oz. bottles.

For more information about Bar's Leaks Rear Main Seal Repair or any other Bar's Leaks or Rislone® products, visit [www.barsproducts.com](http://www.barsproducts.com), call (800) 521-7475 or e-mail [customerservice@barsleaks.com](mailto:customerservice@barsleaks.com).

Bar's Products offers a full line of vehicle chemicals, including Bar's Leaks, the world's most trusted stop-leak brand since 1947, and Rislone, America's best-selling engine treatment brand for more than 75 years. Based in Holly, Michigan, Bar's Products is an ISO 9001:2000 certified company.
