

## Jeff Steere Race Report – May 2009

We had a great time and the car ran very well. The crew did a good job getting the car ready. The rain and wind keep the crowd down, I would put attendance around 3,500. We ran 8th mile instead of the full 1/4. We qualified third but they cut the run off to the top two because of the weather delays. The last time up the car we cut a .11 light and launched hard with a 1.09 60' and carried the front end out past the 60' marker (picture included) and ran 4.78@145mph.

We got the Bars Leaks logos on the car and trailer (I'll send you some pics of the trailer) the new crazy chief is a hit with the kids! We handed out just over 400 fire prevention activity books and are going to be doing a Bars Leaks 33 Willys addition soon.
