

## FREQUENTLY ASKED QUESTIONS

### **BAR'S LEAKS POWER STEERING STOP LEAK P/N P30L**

*Will Bar's Leaks Power Steering Stop Leak help my noisy power steering pump?*

Yes, Bar's Leaks Power Steering Stop Leak contains special friction modifiers to help reduce bearing, piston and valve noises.

*Will Bar's Leaks Power Steering Stop Leak work in all types of power steering fluids?*

Yes, Bar's Leaks is one of the only Power Steering Stop Leaks that is compatible with all petroleum based, mineral oil, synthetic fluids and Dexron ATF. This includes all domestic, import and heavy duty power steering applications.

*How does Bars Leaks Power Steering Stop Leak work?*

After time, power steering seals tend to dry out and shrink. Bar's Leaks Power Steering Stop Leak revitalizes these seals and makes them soft and pliable again.

*How much do I install?*

Our P30L (15.5 oz.) is designed for one bottle to be installed in a passenger car or light truck. One bottle treats two to three quarts of fluid.

*If first application does not completely stop leak, may I add another bottle?*

Yes, you can install a second application for hard to stop leaks. If your leak still persists after a second application, then mechanical attention may be required.

*If I install more than the required amount, will it work faster or better?*

No, we have formulated our product to work best at the suggested dosage amount.

*How long does it take to start working?*

Bar's Leaks starts working the minute you install and start driving the vehicle. You will usually see results in about 150 miles or three (3) days of driving.
